[illegible]

This architectural cross-section illustrates the vertical alignment of the tram stop. The platform is shown at an elevation of +302.90 slm, while the tracks below are at +297.10 slm. The diagram includes a building facade with windows and streetlights in the background, a green tree on the platform, and a set of stairs leading down from the platform level. The platform structure is supported by a series of pillars, and the tracks are shown with overhead power lines. The ground level on the right side of the platform is indicated by a green dotted area.
